

# QUICKJACK™

## SLX Extensions

### SLX FRAME EXTENSION KIT / PAIR

QuickJack's frame extenders increase the lift point spread of the BL-5000SLX and BL-7000SLX by 6 inches. These easy-to-use, removable adapters require no setup whatsoever. They're rugged, lightweight and give an SLX model the same reach as an extended-length EXT model. **Sold in sets of 2.**

#### Instantly increase QuickJack's versatility

With this new QuickJack accessory, you will now be able to accommodate OEM jack points that are spread farther apart than the current SLX models allow. These easy-to-use extensions make it convenient and safe to gain up to 6" of extra reach and 1.5" of extra lifting height. It's just as easy to remove and return your SLX to its regular state. This is the ideal QuickJack accessory for anyone with multiple vehicles and a variance of chassis measurements.

#### The perfect fit

The frame extension adapters drop snugly into QuickJack's lift trays. There's no guesswork as to how the adapter fits on the frame: rugged, welded, tubular steel standoffs (found on the bottom of each adapter), slide perfectly against the edges of QuickJack's rubber block trays. At just 33 lbs. each, the adapters are lightweight enough to pick up and carry. Once the extenders are in place, set QuickJack's rubber blocks in the trays just as you would when using frames alone.

NOTE: DO NOT attempt to roll your QuickJack frames with extensions in place.

- Includes (2) frame extension adapters with 66" lift point spread each
- Rugged 14-gauge steel construction
- Welded tubular steel standoffs for lift tray placement
- Frames are lightweight and easy to carry
- **Fits BL-5000SLX and BL-7000SLX models only**
